Experience

Front-End Developer At [AMS Solutions](#)

Oct 2024 - Jun 2025

- At AMS Solutions, we help businesses streamline operations with our smart ERP system, "Features ERP". I was responsible for customizing front-end code and enhancing the visual layout to align with client needs ensuring clean, user-friendly interfaces tailored to each business.

[Front-End Developer](#)

Mar 2025 - Apr-2025

- I design and build responsive, high-performance front-end interfaces using modern web technologies, with a focus on API integration, SEO, and pixel-perfect design.

Skills

Programming Languages: JavaScript (ES6+), TypeScript

Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design, Animations

Frameworks/Libraries: React.js, Next.js, Redux Toolkit

Version Control: Git, GitHub

Tools: Figma, Chrome DevTools

Others: RESTful APIs, Seo, Performance Optimization, Cross-browser Compatibility, Debugging

Projects

[ZentoMarket](#)

- A multilingual e-commerce training project featuring login, search, filtering, and a user-specific cart. Fully custom-designed with a responsive UI and powered by DummyJSON API for mock product data.

[UltraSoft Solutions](#)

- Built a multi-page, multilingual website using Next.js and TypeScript for an accounting and tech solutions company. The site showcases ERP services like sales, inventory, and finance with a clean, responsive UI.

[Serano-Place-Hotel](#)

- Built a modern, responsive single-page hotel website using React, Tailwind CSS, and Framer Motion. The site showcases hotel rooms, services, gallery, and client testimonials with smooth animations and a user-friendly interface.
